

Dear Valued Contractor Partners,

We are writing to share an important update regarding the Canadian federal government's implementation of a 25% tariff on certain steel derivative products. These measures will continue to impact portions of our supply chain and increase import costs on items such as steel panels, fasteners, plates/screws and other steel-related products commonly used in the construction industry.

As existing inventory is depleted, replenishment costs for affected products will reflect these tariff impacts. Price adjustments may occur in the coming months, and we will communicate updates as information becomes available. At this time, details regarding specific product classifications and tariff levels remain evolving.

ABC Supply remains committed to supporting our contractor partners and maintaining a reliable supply of materials. We appreciate your understanding as we navigate these industry-wide changes together.

If you have any questions, please contact your local ABC Supply team.

Thank you for your continued partnership.

Sincerely,  
**ABC Supply Co.**
